

CSC1005/CSC1022 Database Lab

Lab 2: First SQL Expressions Solution

Goal: Learn simple SQL syntax and how to write your first queries.

The first SQL programming lab is designed to get students familiar with all 3 datasets. Queries are simple but make use of WHERE, LIKE and ORDER BY.

You have finished the lab when you have finished all queries.

Section 1: Sakila (Make Sakila the default database)

1. Which movies have a title containing the word "games"?

Solution: select title from film where title like '%games%';

**GAMES BOWFINGER
HOLIDAY GAMES
RAGE GAMES**

2. Which movies are longer than 2 hours? Hint:

Solution: select title, length from film where length > 120;

3. Did any actors have a surname with "queen" somewhere in the name?

Solution: select first_name, last_name from actor where last_name like '%queen%';

**JULIA MCQUEEN
CATE MCQUEEN**

Section 2. World (Make default database)

4. Get a list of all the cities with over 1 million people, ordered alphabetically.

Solution: select Name, Population from city where Population > 1000000 ORDER BY Name;

5. What countries have a different local name?

Solution: select Name, LocalName from country where Name != LocalName;

OR

Solution: select Name, LocalName from country where Name <> LocalName;

Section 3. Basketball (Make default database)

6. List the ID of the players who won an award in 1989. (Challenge : Don't display duplicate ID's)

Solution: Select (Distinct) playerID from awards_players;

(Next Page)

7. List the ID of the players who scored more than 400 points in less than 900 minutes played during the season 1998

Solution: Select playerID, year , points, minutes from players_teams where points > 400 and minutes < 900 and year = 1998;

playerID	year	points	minutes
curryde01	1998	423	864
wallajo01	1998	411	812

8. Return the name and the number of wins at home of the teams with 'Chicago' in their name during the season 1994.

(Challenge : Return the name of the teams with 'C' in their name during the season 1994 where they won more games at home than away)

Solution: Select name, year, homeWon from teams where name like '%Chicago%' and year = 1994;

name	year	homeWon
Chicago Bulls	1994	28

Challenge Solution: Select name, year, homeWon, awayWon from teams where name like '%C%' and year = 1994 and homeWon>awayWon;
