01 WHAT IS SCRUM?

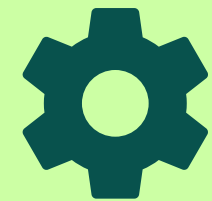

What is Scrum?

- Framework
- Agile spectrum
- Efficient in changing requirements
- Continuous improvement

Why is it used?

- Not rigid as plan-driven
- Flexible and adaptable
- Useful beyond Software Development

Why is it important?

- Natural and realistic flow of work
- Delivers functionalities sooner

Roles in Scrum

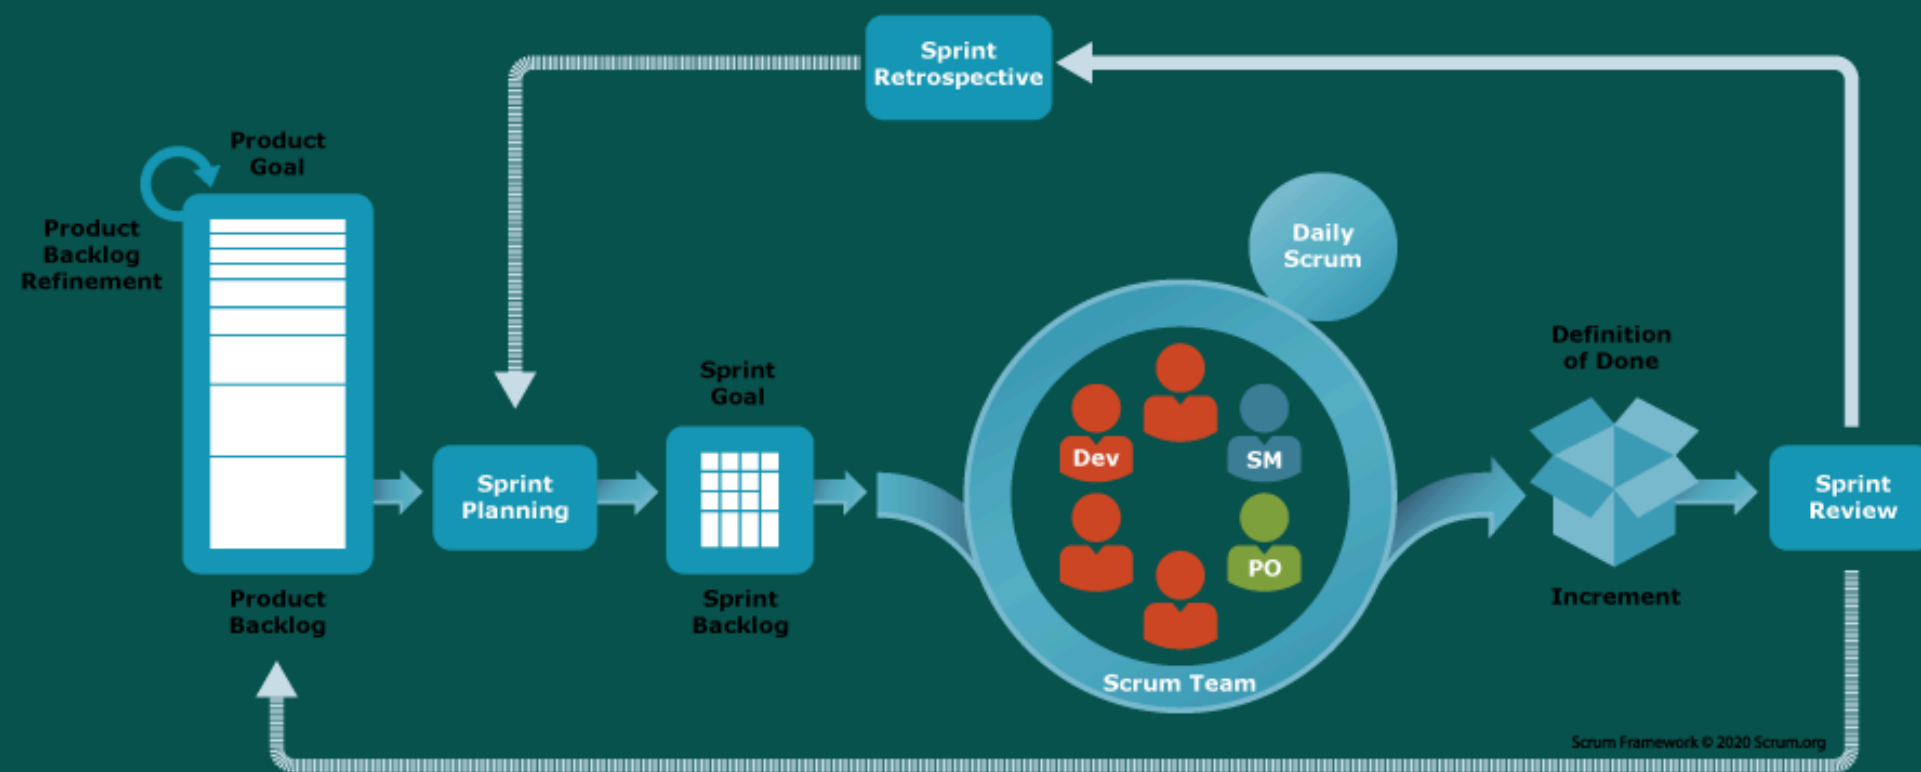

02

HOW DOES SCRUM WORK?

Scrum Framework

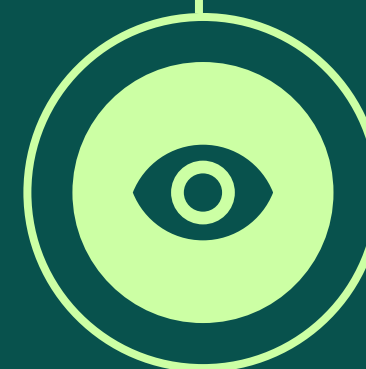

Sprint Planning

A meeting that members use to discuss what are they going to work on in a new Sprint and how it has to be done.

Daily Standup

Held at the start of the day, aiming to synchronize the work of all members. (15 minutes)

Sprint Review

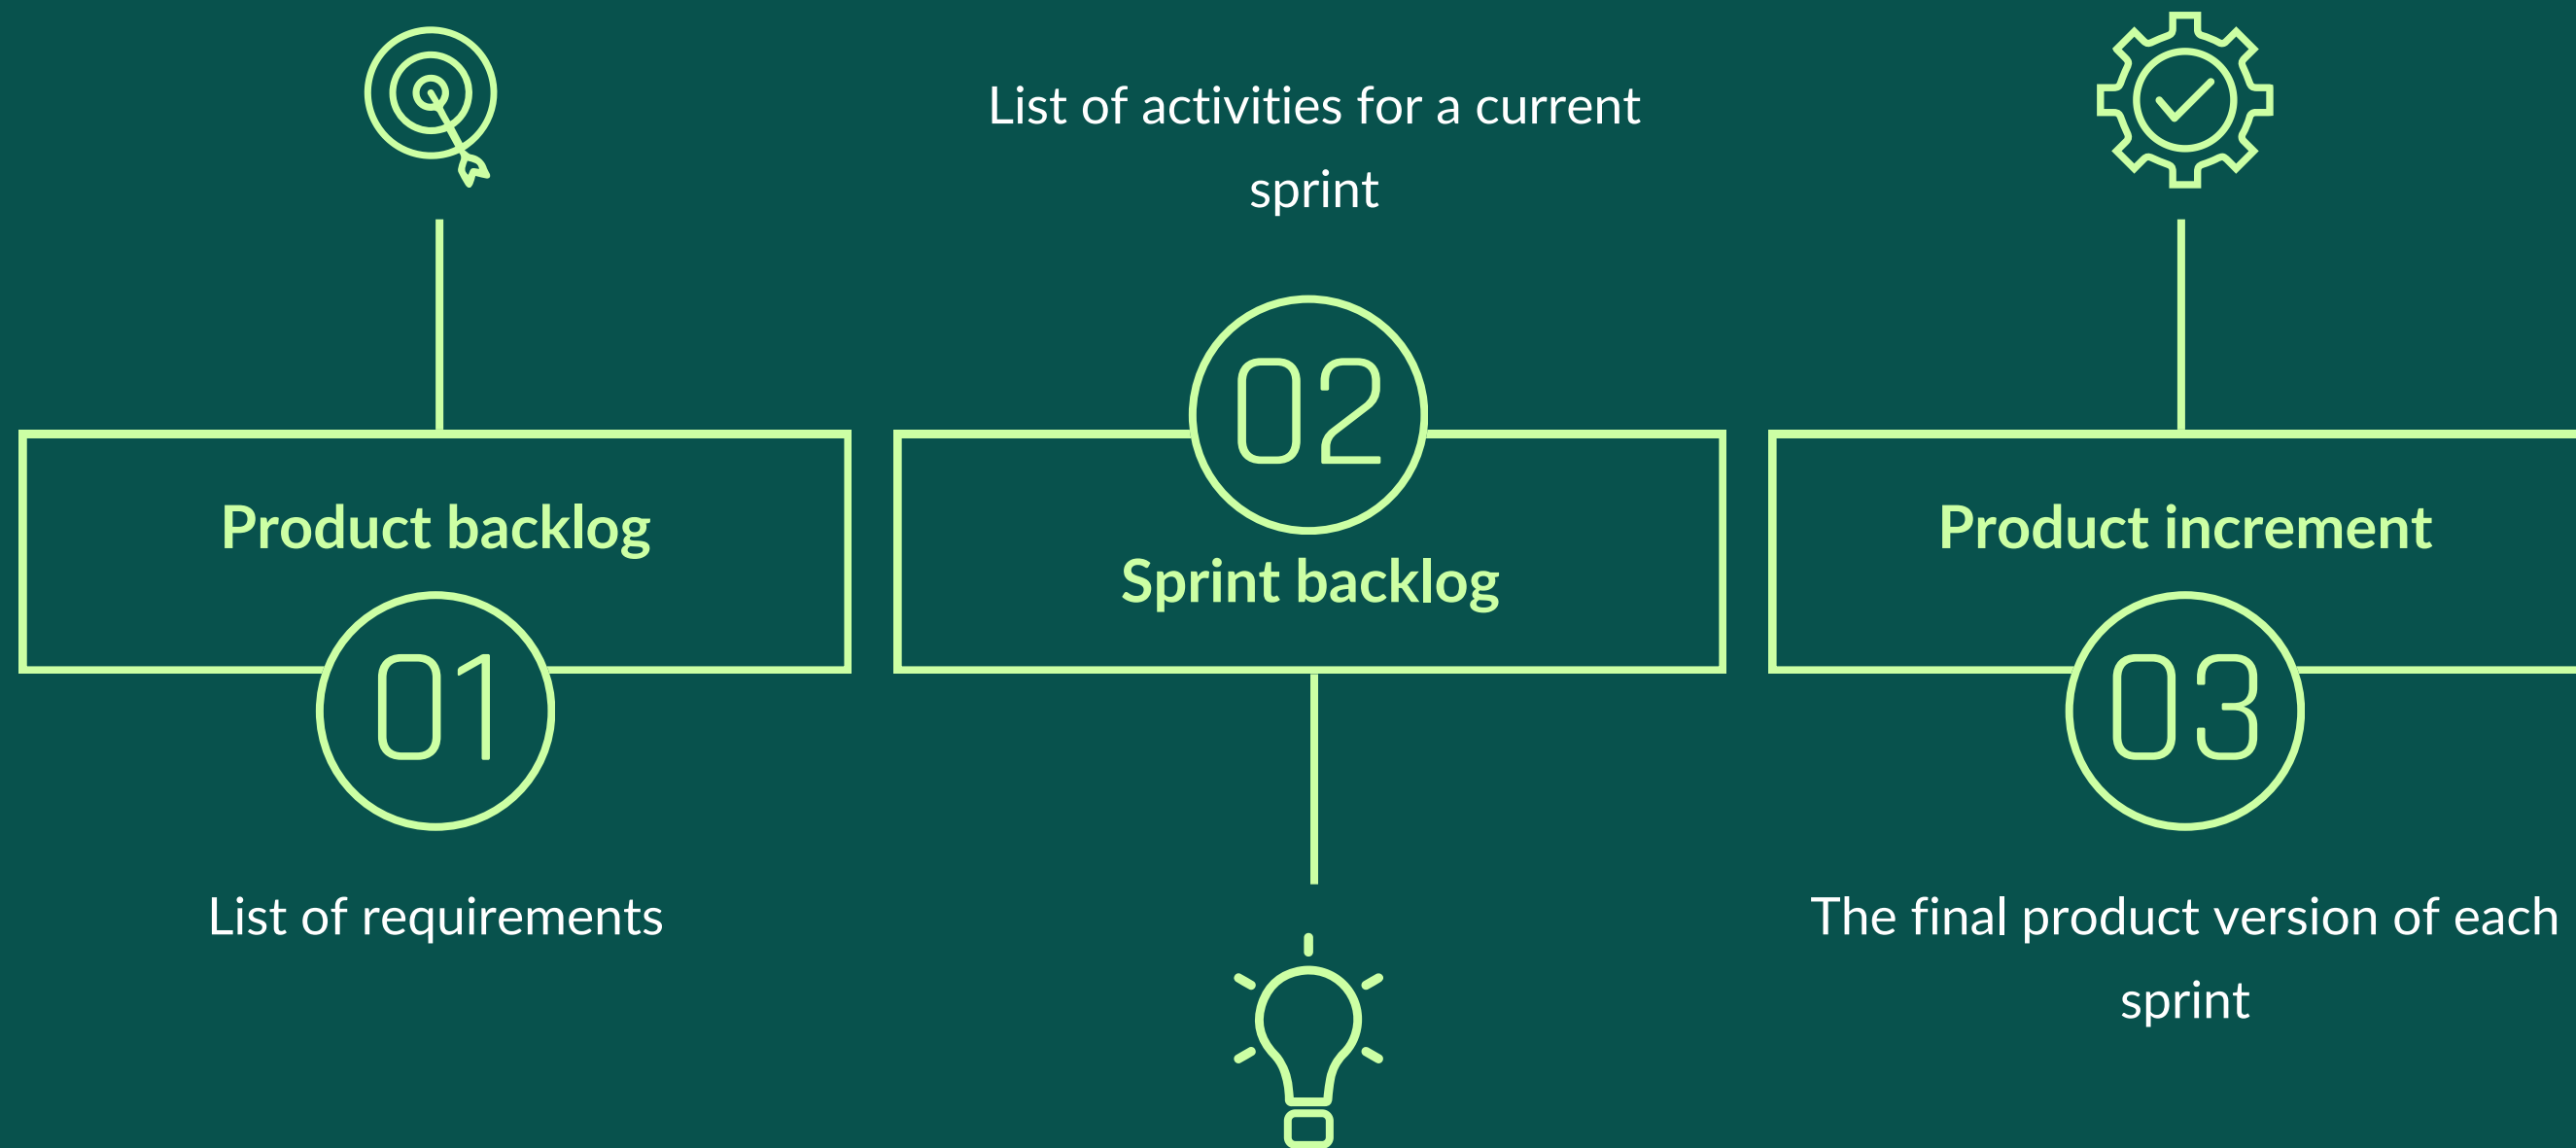

Held at the end of the sprint, aiming to get feedback.

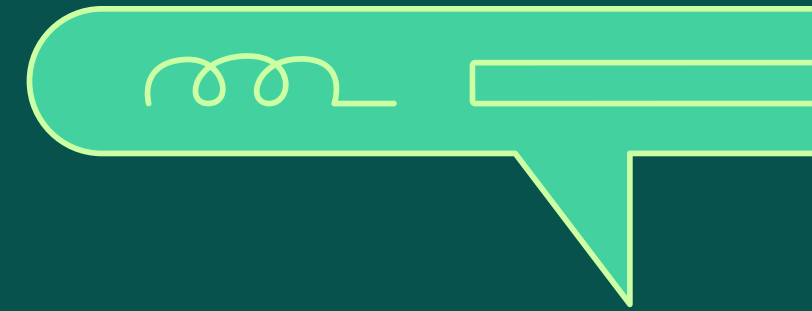

Retrospective

Reflecting on the Sprint and identifying successes and opportunities for improvement. (90 minutes)

Scrum Artefacts
