

CSC1005/CSC1022 Database Lab

Lab 3: SQL Basics

Goal: Learn simple SQL syntax and how to write your basic queries.

This lab is designed to get students familiar with all 3 datasets. Queries are simple but make use of WHERE, LIKE, DISTINCT and ORDER BY.

You have finished the lab when you have finished all queries.

Section 1. Basketball (Make default database)

1. List the ID of the players who won an award in 1989. (Challenge : Don't display duplicate ID's)
2. List the ID of the players who scored more than 400 points in less than 900 minutes played during the season 1998
3. Return the name and the number of wins at home of the teams with 'Chicago' in their name during the season 1994. (Challenge : Return the name of the teams with 'C' in their name during the season 1994 where they won more games at home than away)

Section 2: Sakila (Make Sakila the default database)

4. Show all films with rating 'PG' or 'PG-13', ordered by length (shortest first) and then title.
5. List all distinct film ratings in the database, sorted alphabetically.
6. List all films whose title **starts with 'THE'**, ordered by title.

Section 3. World (Make default database)

7. Get a list of cities in 'USA' where the city name contains the letter sequence 'New', ordered by name. (Hint : use country code in city table)
 8. Find all cities whose name ends with 'burg', ordered by population descending.
 9. Which distinct languages represent the majority language in at least one country? Display ordered by percentage descending. (Hint: Use 'countrylanguage' table)
