

CSC1005/CSC1022 Database Lab

Lab 7: SQL Practice

Goal: Practice miscellaneous SQL queries and try out new DDL clauses.

You have finished the lab when you have finished all queries.

Section 1. Basketball (Make default database)

1. Return the id of the players who in 2000 played more than 1000 minutes and in 2001 played for the Miami Heat and got more than 250 assists.
2. Return the id, the name, the height, and the number of points scored by the player having height more than the average height of all the players and having scored a number of points in 2005 higher than the max number of points scored by anyone in the year 1970.

(Hint: Join and then two nested queries: on points (comparison with the maximum points score in 1970) and on height (average height of players). Use table players_team when looking for info about points scored)

Section 2. World (Make default database)

3. What are the countries with the highest number of different spoken languages? Show only the first 5 results.
(Hint: Group by Country name and sort properly and use LIMIT)
4. Return for each continent, the population of its city having the lowest population.

Section 3. DDL Practice

5. What Create a table called Students with the following columns:
StudentID as an integer, primary key
FirstName and LastName as variable-length strings (max 50 chars)
Email as a unique variable-length string (100 max characters)
DateOfBirth as a date, EnrolmentYear as an integer

Hint: CREATE TABLE Students (
 StudentID INT PRIMARY KEY,

 Email VARCHAR(100) UNIQUE NOT NULL,
 );

6. Fill up the table you created using the following information:

StudentID	FirstName	LastName	Email	DOB	EnrolmentYear
1	Sean	Kelly	sean.kelly@uni.ie	2003-04-12	2022
2	Ciara	Doyle	ciara.doyle@uni.ie	2002-11-05	2021
3	Roisin	Quinn	roisin.quinn@uni.ie	2004-01-23	2023
4	Mark	Nolan	mark.nolan@uni.ie	2003-07-30	2022
5	Brian	Farrell	brian.farrell@uni.ie	2002-09-15	2021

Hint: INSERT INTO Students VALUES (.....)

7. Delete the table student and then drop the table student. What is the difference between the two?
